Welcome!

Introduction to tree grafting  
2011  
Will take place from June.

We will meet at the Residential study centre at 10 am.  
– the isunne team welcome you!

Introduction to tree grafting is open to everybody.

Tree grafting is fun and with this knowledge you could develop and create new trees. A good solution to rebuilding already existing trees. Suitable branches are exchanged and desired strains introduced through grafting. An average size tree could carry 15-20 strains. We will give a brief summary of the main tree trunk and its significance.

When we meet at the residential study centre we will hand out literature on tree grafting and the course leader will go through the material. You will be given the opportunity to study different techniques used today.

After lunch we will take a closer look at the three most common methods. Everybody will be able to try and practice each of the techniques.

Cleft Grafting  
Barkympping  
Budding

**It is all about precision and practice. But even if it's done by the book, unfortunately tree grafting is no guaranteed success.**

Other suggested activities are: fishing, concrete casting, tomato sampling, kitchen garden. Find out more at [www.isunne.se](http://www.isunne.se).
